NOTICE ABOUT AUSGRID KIOSK SUBSTATIONS

As a customer who purchase Ausgrid Kiosk Substations from All Round Supplies, I am writing to you to keep you informed about some important changes being made to the Supply of Ausgrid KL Kiosk Substaions.

Over the past few months there have been some difficulties with the supply of Ausgrid KJ and KL Type Pad Subs with deliveries delayed and lead times increased due to the availability of certain key components such as the Powersense Remote Monitoring unit and Earth Fault Leakage detection device.

Manufacturers of Ausgrid Kiosk Substations have also been advised by Ausgrid they will be no longer free issuing or funding the Powersense Remote Monitoring unit and the cost of this item will be added to the current cost of the kiosk in the future and in turn passed on to the customers.

At this stage there has been no formal indication of what the additional cost would be to the current cost of an Ausgrid Kiosk Substation, however the increase may be significant (Between \$8,000 to \$15,000) for a KL Type Kiosk needing the Power Sense Remote monitoring device.

As more information comes to hand we will again be in contact with you to keep you informed. Should you have any concerns, All Round Supplies encourages you to contact your Ausgrid contact and discuss these changes directly with them.

Should you wish to speak to All Round Supplies, I encourage your to speak to your account manager or myself on the following numbers.

Steve Blair: 0401-896-172
Glenn Rochaix: 0400-077-097
Hector Cerda: 0408-786-580
Joseph Rau: 0488-175-384

Thank you,

Regards,

Joseph Rau | National Sales & Marketing Manager
